New Zealand International Doctoral Research Scholarships

**Funded by the New Zealand Government
Administered by Education New Zealand**

Dear Referee,

The New Zealand International Doctoral Research Scholarships are part of a new international scholarship scheme announced by the Minister of Education in May 2004.

The key objectives of the scholarships are to:

- attract top international students to study in New Zealand
- enhance the reputation and profile of the New Zealand tertiary education sector
- add to the research capability and output of New Zealand tertiary providers
- advance education diplomacy objectives through partnerships with key regions and countries.

We expect that those selected for a New Zealand International Doctoral Research Scholarship will have already established a record of academic excellence, and demonstrate the potential to succeed in their own research objectives, while contributing to the broader research goals of the New Zealand educational community.

The New Zealand International Doctoral Research Scholarship scheme is an important component in the Ministry of Education's international education strategy, developed in recognition of the valuable contribution made by international postgraduate research students to the quality of research at New Zealand universities.

The New Zealand Government has appointed Education New Zealand as the Administrator of the New Zealand International Doctoral Research Scholarship programme. Education New Zealand both serves and represents the international education sector, with expertise in developing relationships with governments, institutions and students in the international education context.

Thank you for assisting us in the selection process by providing a Referee's Report. Your report may be sent to Education New Zealand by mail (addresses overleaf) or fax (+64 4 471 2828), or you may return your report to the student in a sealed envelope for submission with application materials (please sign across the seal). Please do not e-mail your comments unless they include your signature.

Yours sincerely

Robert Stevens
Chief Executive
Education New Zealand

Please comment on the applicant's potential to successfully complete a doctoral research degree by evaluating the applicant against the criteria in the table below.

	Excellent	Very Good	Good	Average
Intellectual ability and academic standard				
Ability to analyse and problem solve				
Ability to transfer knowledge				
Personal integrity				
Communication skills				
Resourcefulness and creativity				
Independence and initiative				
Adaptability to new situations				
Potential for future contribution in field				

Please attach a letter further commenting on why you think the applicant should be awarded a New Zealand International Doctoral Research Scholarship (two pages or less please). You may find it helpful to discuss some of the traits in the table above in relation to the following selection criteria to be applied in awarding the scholarships:

- The applicant has a record of sustained academic excellence, particularly in the chosen field of study, as supported by transcripts and referees' reports.
- The applicant has a well-defined research programme, and wishes to study at a New Zealand university with the expertise and resources to support that research.
